Chapter 1

Thermo-Calc c-api

The main part of this manual is a technical description of the TC-API. To find details on the Thermodynamic applications of each library function see the section on tcapi.h.

1.1 Installed files

In the distribution of Thermo-Calc c-api, the following folders and files can be found.

1.1.1 TC-API libraries.

These could be .lib, .dll, .so -files depending on your installation.
E.g. on a 64 bit Windows system you will find:
tcapi-win-x64-.dll and tcapi-win-x64-.lib

1.1.2 Source folder.

This is the c code for running the the different examples. Some of this code can be reused in user-written projects.

1.1.3 Project folders for building the example code

Linux:
-> Linux/Linux-Dynamic-Linking
-> Linux/Linux-Explicit-Loading
Windows:
-> Windows-Mingw32-Explicit-Loading
-> Windows-Studio-Project-Dynamic-Linking
-> Windows-Studio-Project-Explicit-Loading

1.2 Explicit loading or Dynamic linking

When using Dynamic Linking, the libraries (.so or .lib) and the header-files of the tcapi are needed when the program is being built.

When using Explicit Loading no libraries are needed for the build. They are loaded at runtime (.so or .dll).

1.3 About the source code

1.3.1 The dynamic linking examples use the files

Simple thermodynmic calculations to demonstrate the use of this api.
example1.c
example2.c
example3.c

Utility functions for finding the correct environment variables
tcutils.c
tcutils.h

Declarations and documentation on all TC-API functions
tcapi.h

Thermo-Calc proprietary declarations and definitions. DO NOT EDIT.
tc_data_defs.h

1.3.2 The explicit loading examples use the files

Utilities to simplify working with explicitly loaded dll.
libtc.c
libtc.h

Simple thermodynmic calculations to demonstrate the use of this api.
tcExamples.c
tcExamples.h

Main program to exemplify hos this api can be used
tcMain.c

Utility functions for finding the correct environment variables
tcutils.c
tcutils.h

Thermo-Calc proprietary declarations and definitions. DO NOT EDIT.
tc_data_defs.h

1.4 When starting developing proprietary projects the following code is needed

1.4.1 The dynamic linking examples use the files

tcapi.h
tc_data_defs.h

1.4.2 The explicit loading examples use the files

libtc.c
libtc.h
tc_data_defs.h

(tcMain.c can give an idea of how the above files can be used)

Chapter 2

Class Index

2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

Chapter 3

File Index

3.1 File List

Here is a list of all files with brief descriptions:

Chapter 4

Class Documentation

4.1 _tc_function_library Struct Reference

`#include <libtc.h>`

Public Attributes

- VoidFuncString tc_append_database
- BoolFuncStringStringStrLen tc_check_license
- StringFuncString tc_component_status
- VoidFuncNoParams tc_compute_equilibrium
- VoidFuncInt tc_create_new_equilibrium
- IntFuncStringInt tc_database
- VoidFuncStringIntInt tc_define_components
- IntFuncNoParams tc_degrees_of_freedom
- VoidFuncNoParams tc_deinit
- VoidFuncString tc_delete_condition
- VoidFuncString tc_delete_symbol
- IntFuncStringInt tc_element
- VoidFuncString tc_element_reject
- VoidFuncString tc_element_select
- VoidFuncStringString tc_enter_ges5_parameter
- VoidFuncStringStringIntIntFloatString tc_enter_symbol
- BoolFuncIntPStringInt tc_error
- VoidFuncString tc_ges5
- VoidFuncNoParams tc_get_data
- VoidFuncStringFloatPFloatP tc_get_derivatives
- VoidFuncStringStringInt tc_get_ges5_parameter
- FloatFuncString tc_get_value
- IntFuncNoParams tc_init_root
- IntFuncStringString tc_init_root3
- VoidFuncStringInt tc_list_component
- VoidFuncStringInt tc_list_conditions
- VoidFuncStringInt tc_list_phase
- VoidFuncStringInt tc_list_species
- IntFuncStringIntIntP tc_list_symbols
- IntFuncString tc_nr_of_constituents_in_phase
- VoidFuncString tc_open_database
- IntFuncStringInt tc_phase

- IntFuncStringIntPStringIntFloatP tc_phase_all_constituents
- IntFuncStringIntPStringIntFloatP tc_phase_constituents
- VoidFuncString tc_phase_reject
- VoidFuncString tc_phase_select
- StringFuncString tc_phase_status
- IntFuncStringIntPStringStrLenFloatP tc_phase_structure
- VoidFuncString tc_poly3
- VoidFuncStringFloatP tc_put_sitefractions
- VoidFuncString tc_read_poly3_file
- VoidFuncStringIntString tc_reject_constituent
- VoidFuncNoParams tc_reset_error
- VoidFuncStringIntString tc_restore_constituent
- VoidFuncString tc_save_poly3_file
- VoidFuncInt tc_select_equilibrium
- VoidFuncStringString tc_set_component_status
- VoidFuncStringFloat tc_set_condition
- VoidFuncInt tc_set_license_code
- VoidFuncIntPIntPIntPIntP tc_set_minimization_option
- VoidFuncStringFloat tc_set_phase_addition
- VoidFuncStringStringFloat tc_set_phase_status
- VoidFuncStringFloat tc_set_start_value
- StringFuncString tc_species_status
- VoidFuncStringInt tc_version

4.1.1 Detailed Description

Definition at line 67 of file libtc.h.

4.1.2 Member Data Documentation

4.1.2.1 VoidFuncString _tc_function_library::tc_append_database

Definition at line 68 of file libtc.h.

4.1.2.2 BoolFuncStringStringStrLen _tc_function_library::tc_check_license

Definition at line 69 of file libtc.h.

4.1.2.3 StringFuncString _tc_function_library::tc_component_status

Definition at line 70 of file libtc.h.

4.1.2.4 VoidFuncNoParams _tc_function_library::tc_compute_equilibrium

Definition at line 71 of file libtc.h.

4.1.2.5 VoidFuncInt _tc_function_library::tc_create_new_equilibrium

Definition at line 72 of file libtc.h.

4.1.2.6 IntFuncStringInt _tc_function_library::tc_database

Definition at line 73 of file libtc.h.

4.1.2.7 VoidFuncStringIntInt _tc_function_library::tc_define_components

Definition at line 74 of file libtc.h.

4.1.2.8 IntFuncNoParams _tc_function_library::tc_degrees_of_freedom

Definition at line 75 of file libtc.h.

4.1.2.9 VoidFuncNoParams _tc_function_library::tc_deinit

Definition at line 76 of file libtc.h.

4.1.2.10 VoidFuncString _tc_function_library::tc_delete_condition

Definition at line 77 of file libtc.h.

4.1.2.11 VoidFuncString _tc_function_library::tc_delete_symbol

Definition at line 78 of file libtc.h.

4.1.2.12 IntFuncStringInt _tc_function_library::tc_element

Definition at line 79 of file libtc.h.

4.1.2.13 VoidFuncString _tc_function_library::tc_element_reject

Definition at line 80 of file libtc.h.

4.1.2.14 VoidFuncString _tc_function_library::tc_element_select

Definition at line 81 of file libtc.h.

4.1.2.15 VoidFuncStringString _tc_function_library::tc_enter_ges5_parameter

Definition at line 82 of file libtc.h.

4.1.2.16 VoidFuncStringStringIntIntFloatString _tc_function_library::tc_enter_symbol

Definition at line 83 of file libtc.h.

4.1.2.17 BoolFuncIntPStringInt _tc_function_library::tc_error

Definition at line 84 of file libtc.h.

4.1.2.18 VoidFuncString _tc_function_library::tc_ges5

Definition at line 85 of file libtc.h.

4.1.2.19 VoidFuncNoParams _tc_function_library::tc_get_data

Definition at line 86 of file libtc.h.

4.1.2.20 VoidFuncStringFloatPFloatP _tc_function_library::tc_get_derivatives

Definition at line 87 of file libtc.h.

4.1.2.21 VoidFuncStringStringInt _tc_function_library::tc_get_ges5_parameter

Definition at line 88 of file libtc.h.

4.1.2.22 FloatFuncString _tc_function_library::tc_get_value

Definition at line 89 of file libtc.h.

4.1.2.23 IntFuncNoParams _tc_function_library::tc_init_root

Definition at line 90 of file libtc.h.

4.1.2.24 IntFuncStringString _tc_function_library::tc_init_root3

Definition at line 91 of file libtc.h.

4.1.2.25 VoidFuncStringInt _tc_function_library::tc_list_component

Definition at line 92 of file libtc.h.

4.1.2.26 VoidFuncStringInt _tc_function_library::tc_list_conditions

Definition at line 93 of file libtc.h.

4.1.2.27 VoidFuncStringInt _tc_function_library::tc_list_phase

Definition at line 94 of file libtc.h.

4.1.2.28 VoidFuncStringInt _tc_function_library::tc_list_species

Definition at line 95 of file libtc.h.

4.1.2.29 IntFuncStringIntIntP _tc_function_library::tc_list_symbols

Definition at line 96 of file libtc.h.

4.1.2.30 IntFuncString _tc_function_library::tc_nr_of_constituents_in_phase

Definition at line 97 of file libtc.h.

4.1.2.31 VoidFuncString _tc_function_library::tc_open_database

Definition at line 98 of file libtc.h.

4.1.2.32 IntFuncStringInt _tc_function_library::tc_phase

Definition at line 99 of file libtc.h.

4.1.2.33 IntFuncStringIntPStringIntFloatP _tc_function_library::tc_phase_all_constituents

Definition at line 100 of file libtc.h.

4.1.2.34 IntFuncStringIntPStringIntFloatP _tc_function_library::tc_phase_constituents

Definition at line 101 of file libtc.h.

4.1.2.35 VoidFuncString _tc_function_library::tc_phase_reject

Definition at line 102 of file libtc.h.

4.1.2.36 VoidFuncString _tc_function_library::tc_phase_select

Definition at line 103 of file libtc.h.

4.1.2.37 StringFuncString _tc_function_library::tc_phase_status

Definition at line 104 of file libtc.h.

4.1.2.38 IntFuncStringIntPStringStrLenFloatP _tc_function_library::tc_phase_structure

Definition at line 105 of file libtc.h.

4.1.2.39 VoidFuncString _tc_function_library::tc_poly3

Definition at line 106 of file libtc.h.

4.1.2.40 VoidFuncStringFloatP _tc_function_library::tc_put_sitefractions

Definition at line 107 of file libtc.h.

4.1.2.41 VoidFuncString _tc_function_library::tc_read_poly3_file

Definition at line 108 of file libtc.h.

4.1.2.42 VoidFuncStringIntString _tc_function_library::tc_reject_constituent

Definition at line 109 of file libtc.h.

4.1.2.43 VoidFuncNoParams _tc_function_library::tc_reset_error

Definition at line 110 of file libtc.h.

4.1.2.44 VoidFuncStringIntString _tc_function_library::tc_restore_constituent

Definition at line 111 of file libtc.h.

4.1.2.45 VoidFuncString _tc_function_library::tc_save_poly3_file

Definition at line 112 of file libtc.h.

4.1.2.46 VoidFuncInt _tc_function_library::tc_select_equilibrium

Definition at line 113 of file libtc.h.

4.1.2.47 VoidFuncStringString _tc_function_library::tc_set_component_status

Definition at line 114 of file libtc.h.

4.1.2.48 VoidFuncStringFloat _tc_function_library::tc_set_condition

Definition at line 115 of file libtc.h.

4.1.2.49 VoidFuncInt _tc_function_library::tc_set_license_code

Definition at line 116 of file libtc.h.

4.1.2.50 VoidFuncIntPIntPIntPIntP _tc_function_library::tc_set_minimization_option

Definition at line 117 of file libtc.h.

4.1.2.51 VoidFuncStringFloat _tc_function_library::tc_set_phase_addition

Definition at line 118 of file libtc.h.

4.1.2.52 VoidFuncStringStringFloat _tc_function_library::tc_set_phase_status

Definition at line 119 of file libtc.h.

4.1.2.53 VoidFuncStringFloat _tc_function_library::tc_set_start_value

Definition at line 120 of file libtc.h.

4.1.2.54 StringFuncString _tc_function_library::tc_species_status

Definition at line 121 of file libtc.h.

4.1.2.55 VoidFuncStringInt _tc_function_library::tc_version

Definition at line 122 of file libtc.h.

The documentation for this struct was generated from the following file:

- libtc.h

4.2 tc_components_strings Struct Reference

`#include <tc_data_defs.h>`

Public Attributes

- char component [TC_STRLEN_COMPONENTS]

4.2.1 Detailed Description

Definition at line 111 of file tc_data_defs.h.

4.2.2 Member Data Documentation

4.2.2.1 char tc_components_strings::component[TC_STRLEN_COMPONENTS]

Definition at line 113 of file tc_data_defs.h.

The documentation for this struct was generated from the following file:

- tc_data_defs.h

4.3 tc_conditions_as_arrays_of_strings Struct Reference

`#include <tc_data_defs.h>`

Public Attributes

- char condition [TC_STRLEN_MAX]

4.3.1 Detailed Description

Definition at line 98 of file tc_data_defs.h.

4.3.2 Member Data Documentation

4.3.2.1 char tc_conditions_as_arrays_of_strings::condition[TC_STRLEN_MAX]

Definition at line 100 of file tc_data_defs.h.

The documentation for this struct was generated from the following file:

- tc_data_defs.h

4.4 tc_constituents_strings Struct Reference

`#include <tc_data_defs.h>`

Public Attributes

- char constituent [TC_STRLEN_CONSTITUENTS]

4.4.1 Detailed Description

Definition at line 130 of file tc_data_defs.h.

4.4.2 Member Data Documentation

4.4.2.1 char tc_constituents_strings::constituent[TC_STRLEN_CONSTITUENTS]

Definition at line 132 of file tc_data_defs.h.

The documentation for this struct was generated from the following file:

- tc_data_defs.h

4.5 tc_databases_strings Struct Reference

`#include <tc_data_defs.h>`

Public Attributes

- char database [TC_STRLEN_DATABASE]

4.5.1 Detailed Description

Definition at line 136 of file tc_data_defs.h.

4.5.2 Member Data Documentation

4.5.2.1 char tc_databases_strings::database[TC_STRLEN_DATABASE]

Definition at line 138 of file tc_data_defs.h.

The documentation for this struct was generated from the following file:

- tc_data_defs.h

4.6 tc_elements_strings Struct Reference

`#include <tc_data_defs.h>`

Public Attributes

- char element [TC_STRLEN_ELEMENTS]

4.6.1 Detailed Description

Definition at line 105 of file tc_data_defs.h.

4.6.2 Member Data Documentation

4.6.2.1 char tc_elements_strings::element[TC_STRLEN_ELEMENTS]

Definition at line 107 of file tc_data_defs.h.

The documentation for this struct was generated from the following file:

- tc_data_defs.h

4.7 tc_phases_strings Struct Reference

`#include <tc_data_defs.h>`

Public Attributes

- char phase [TC_STRLEN_PHASES]

4.7.1 Detailed Description

Definition at line 124 of file tc_data_defs.h.

4.7.2 Member Data Documentation

4.7.2.1 char tc_phases_strings::phase[TC_STRLEN_PHASES]

Definition at line 126 of file tc_data_defs.h.

The documentation for this struct was generated from the following file:

- tc_data_defs.h

4.8 tc_reference_strings Struct Reference

`#include <tc_data_defs.h>`

Public Attributes

- char reference [TC_STRLEN_REFERENCE]

4.8.1 Detailed Description

Definition at line 142 of file tc_data_defs.h.

4.8.2 Member Data Documentation

4.8.2.1 char tc_reference_strings::reference[TC_STRLEN_REFERENCE]

Definition at line 144 of file tc_data_defs.h.

The documentation for this struct was generated from the following file:

- tc_data_defs.h

4.9 tc_species_strings Struct Reference

```
#include <tc_data_defs.h>
```

Public Attributes

- char specie [TC_STRLEN_SPECIES]

4.9.1 Detailed Description

Definition at line 117 of file tc_data_defs.h.

4.9.2 Member Data Documentation

4.9.2.1 char tc_species_strings::specie[TC_STRLEN_SPECIES]

Definition at line 119 of file tc_data_defs.h.

The documentation for this struct was generated from the following file:

- tc_data_defs.h

Chapter 5

File Documentation

5.1 example1.c File Reference

```
#include <stdio.h>
#include <string.h>
#include "tcapi.h"
#include "tcutils.h"
```

Include dependency graph for example1.c:

5.2 example2.c File Reference

```
#include <stdio.h>
#include <string.h>
#include "tcapi.h"
#include "tcutils.h"
```

Include dependency graph for example2.c:

Functions

- int main (int argc, char **argv)

5.2.1 Function Documentation

5.2.1.1 int main (int *argc,* char ** *argv*)

Definition at line 14 of file example2.c.

5.3 example3.c File Reference

```
#include <stdio.h>
#include <string.h>
#include "tcapi.h"
#include "tcutils.h"
```

Include dependency graph for example3.c:

Typedefs

- typedef char str8[8]
- typedef str8 strvect[100]
- typedef TC_INT ivect[50]
- typedef TC_FLOAT rvect[50]

Functions

- int main (int argc, char **argv)

5.3.1 Typedef Documentation

5.3.1.1 typedef TC_INT ivect[50]

Definition at line 16 of file example3.c.

5.3.1.2 typedef TC_FLOAT rvect[50]

Definition at line 17 of file example3.c.

5.3.1.3 typedef char str8[8]

Definition at line 14 of file example3.c.

5.3.1.4 typedef str8 strvect[100]

Definition at line 15 of file example3.c.

5.3.2 Function Documentation

5.3.2.1 int main (int *argc,* char ** *argv*)

Definition at line 19 of file example3.c.

5.4 libtc.c File Reference

```
#include "libtc.h"
```

Include dependency graph for libtc.c:

Functions

- void * tcloadfunc (TCHANDLE tcHandle, char *function_name)
- int importFunctions (TCHANDLE tcHandle, tc_function_library *tc, char *message)

5.4.1 Function Documentation

5.4.1.1 int importFunctions (TCHANDLE *tcHandle,* tc_function_library * *tc,* char * *message*)

Definition at line 23 of file libtc.c.

5.4.1.2 void* tcloadfunc (TCHANDLE *tcHandle,* char * *function_name*)

Definition at line 11 of file libtc.c.

5.5 libtc.h File Reference

```

5.9.1 Function Documentation

5.9.1.1 void tc_append_database (TC_STRING *name*)

Appends the named database

5.9.1.2 TC_BOOL tc_check_license (TC_STRING *name*, TC_STRING *message*, TC_STRING_LENGTH *strlen_message*)

Returns true if the checked license is available and valid, currently accepts: TC_DLL, TC_GUI and TC_TC4U

5.9.1.3 TC_STRING tc_component_status (TC_STRING *component_name*)

Returns the status of "component_name" where status may be one of "ENTERED" or "SUSPENDED"

5.9.1.4 void tc_compute_equilibrium ( )

Computes the equilibrium in POLY-3 using the currently set conditions

5.9.1.5 void tc_create_new_equilibrium (TC_INT *equilibrium*)

Creates a new equilibrium in POLY-3 with number "equilibrium number".

5.9.1.6 TC_INT tc_database (TC_STRING *datan*, TC_INT *linelen*)

Returns the number of databases in the system and their names in "datan"

5.9.1.7 void tc_define_components (TC_STRING *component_name*, TC_INT *strlen*, TC_INT *number_of_components*)

Redefines the components in the system to the components in "component_name".

5.9.1.8 TC_INT tc_degrees_of_freedom ( )

Returns the degrees of freedom in the system. This must be zero in order to perform an equilibrium calculation.

5.9.1.9 void tc_deinit ( )

5.9.1.10 void tc_delete_condition (TC_STRING *condition*)

Deletes the condition for the expression in "condition".

5.9.1.11 void tc_delete_symbol (TC_STRING *symbol*)

Deletes a symbol in the system.

5.9.1.12 TC_INT tc_element (TC_STRING *elements,* TC_INT *linelen*)

Returns the number of elements in the database and their names in "elements"

5.9.1.13 void tc_element_reject (TC_STRING *element_name*)

Rejects "element_name" in the currently selected database.

5.9.1.14 void tc_element_select (TC_STRING *element_name*)

Selects "element_name" in the currently selected database.

5.9.1.15 void tc_enter_ges5_parameter (TC_STRING *parameter,* TC_STRING *expression*)

Enters a parameter expression

5.9.1.16 void tc_enter_symbol (TC_STRING *symbol,* TC_STRING *type,* TC_INT *argument_type,* TC_INT *integer_argument,* TC_FLOAT *double_argument,* TC_STRING *string_argument*)

Enters a symbol in the system, the symbol type may be one of "CONSTANT", "VARIABLE", "FUNCTION" or "T↩ ABLE", "argument_type" defines which of the following arguments will be used, 1 indicates the integer argument, 2 the double argument and 3 the string argument.

5.9.1.17 TC_BOOL tc_error (TC_INT * *error_number,* TC_STRING *message,* TC_INT *strlen*)

Returns true if an error has been set, returning the error number in "error_number" and its corresponding message in "message"

5.9.1.18 void tc_ges5 (TC_STRING *command*)

Sends a command to the GES5 module as defined in the argument "command"

5.9.1.19 void tc_get_data ( )

Executes the database command "GET_DATA"

5.9.1.20 void tc_get_derivatives (TC_STRING *phase_name,* TC_FLOAT * *arr1,* TC_FLOAT * *arr2*)

Returns Gm and the first derivatives with respect to site-fractions in "arr1" and the second derivatives in "arr2" as GM.Y1.Y1, GM.Y1.Y2, GM.Y2.Y2, GM.Y1.Y3, GM.Y2.Y3, GM.YN.YN

5.9.1.21 void tc_get_ges5_parameter (TC_STRING *parameter,* TC_STRING *expression,* TC_INT *strlenExpression*)

Retrieves the expression of a parameter name

5.9.1.22 TC_FLOAT tc_get_value (TC_STRING *symbol*)

Retrieves the symbol or state variable value from the POLY-3 module.

5.9.1.23 TC_INT tc_init_root ( )

Initializes the Thermo-Calc system. This function (or tc_init_root3) must be called prior to anything else.

5.9.1.24 TC_INT tc_init_root3 (TC_STRING *tmppath,* TC_STRING *tcpath*)

Initializes the Thermo-Calc system. This function (or tc_init_root) must be called prior to anything else. tmppath Path to directory for log file tcpath Path to Thermo-Calc installation (Used to find databases)

5.9.1.25 TC_INT tc_list_component (TC_STRING *component_name,* TC_INT *strlen*)

Returns the number of components in the system and their names in "component_name".

5.9.1.26 TC_INT tc_list_conditions (TC_STRING *conditions,* TC_INT *strlen*)

Returns the number of conditions set and their values in "conditions"

5.9.1.27 TC_INT tc_list_phase (TC_STRING *phase_name,* TC_INT *strlen*)

Returns the number of phases in the system and their names in "phase_name".

5.9.1.28 TC_INT tc_list_species (TC_STRING *species_name,* TC_INT *strlen*)

Returns the number of species in the system and their names in "species_name".

5.9.1.29 TC_INT tc_list_symbols (TC_STRING *symbols,* TC_INT *strlen,* TC_INT * *type*)

Returns the number of defined symbols in the system with their expression and value in "symbols" and their corresponding type in "type of symbol", where the type may be one of 1="CONSTANT", 2="VARIABLE" 3="FUNCTION" 4="TABLE"

5.9.1.30 TC_INT tc_nr_of_constituents_in_phase (TC_STRING *phase_name*)

5.9.1.31 void tc_open_database (TC_STRING *name*)

Opens the named database "name_of_database"

5.9.1.32 TC_INT tc_phase (TC_STRING *phases,* TC_INT *linelen*)

Returns the number of phases in the system with the selected elements. NOTE: the routine returns the number of all available phases.

5.9.1.33 TC_INT tc_phase_all_constituents (TC_STRING *phase_name,* TC_INT * *constituent_array,* TC_STRING *element_array,* TC_INT *strLenElem,* TC_FLOAT * *number_of_sites*)

Returns the number of sublattices in the phase (including phases with the status SUSPENDED), the number of constituents on each sublattice in "constituent_array", the name of the selected species on each sublattice one after each other in "element_array" and the "number_of_sites" on each sublattice.

5.9.1.34 TC_INT tc_phase_constituents (TC_STRING *phase_name,* TC_INT * *constituent_array,* TC_STRING *element_array,* TC_INT *strLenElem,* TC_FLOAT * *number_of_sites*)

Returns the number of sublattices in the phase, the number of constituents on each sublattice in "constituent_array", the name of the selected species on each sublattice one after each other in "element_array" and the "number of sites" on each sublattice.

5.9.1.35 void tc_phase_reject (TC_STRING *phase_name*)

Rejects the phase in "phase_name"

5.9.1.36 void tc_phase_select (TC_STRING *phase_name*)

Selects the phase in "phase_name"

5.9.1.37 TC_STRING tc_phase_status (TC_STRING *phase_name*)

Returns the status of "phase_name" where status may be one of "FIXED", "SUSPENDED" or "ENTERED"

5.9.1.38 TC_INT tc_phase_structure (TC_STRING *phase_name,* TC_INT * *constituent_array,* TC_STRING *species_array,* TC_STRING_LENGTH *strLenSpecies,* TC_FLOAT * *number_of_sites*)

Returns the number of sublattices in the phase, the number of constituents on each sublattice in "constituent_↩ array", the name of the species on each sublattice one after each other in "species_array" and the number of sites in "number of sites".

5.9.1.39 void tc_poly3 (TC_STRING *command*)

Sends a command to POLY-3 module as defined in the argument "command"

5.9.1.40 void tc_put_sitefractions (TC_STRING *phase_name,* TC_FLOAT * *sfarr*)

5.9.1.41 void tc_read_poly3_file (TC_STRING *filename*)

Loads the workspace from file "filename" in POLY-3.

5.9.1.42 void tc_reject_constituent (TC_STRING *phase_name,* TC_INT *sublattice,* TC_STRING *constituent*)

Rejects the constituent "constituent" on sublattice "sublattiice" from phase "phase_name".

5.9.1.43 void tc_reset_error ( )

Resets the error if an error has been set

5.9.1.44 void tc_restore_constituent (TC_STRING *phase_name,* TC_INT *sublattice,* TC_STRING *constituent*)

Restores the constituent "constituent" on sublattice "sublattice" from phase "phase_name".

5.9.1.45 void tc_save_poly3_file (TC_STRING *filename*)

Stores/overwrites the current workspace in POLY-3 on the file "filename".

5.9.1.46 void tc_select_equilibrium (TC_INT *equilibrium*)

Selects an equilibrium in POLY-3 with number "equilibrium".

5.9.1.47 void tc_set_component_status (TC_STRING *component_name,* TC_STRING *status*)

Sets the status of "component_name" to "status" to one of "ENTERED" or "SUSPENDED"

5.9.1.48 void tc_set_condition (TC_STRING *condition,* TC_FLOAT *value*)

Sets a condition for the expression in "condition" to value in "value".

5.9.1.49 void tc_set_license_code (TC_INT *code*)

5.9.1.50 void tc_set_minimization_option (TC_INT * *global_flag,* TC_INT * *max_gridpoints,* TC_INT * *frequency,* TC_INT * *mesh_flag*)

Sets parameters for global minimization

5.9.1.51 void tc_set_phase_addition (TC_STRING *phase_name,* TC_FLOAT *addition*)

Sets the addition "addition" to the Gibbs

5.9.1.52 void tc_set_phase_status (TC_STRING *phase_name,* TC_STRING *status,* TC_FLOAT *value*)

Sets the status of "phase_name" to "status" to one of "FIXED", "SUSPENDED", DORMANT" or "ENTERED".

5.9.1.53 void tc_set_start_value (TC_STRING *state_variable,* TC_FLOAT *starting_value*)

Sets a starting value for the "state_variable" to "start_value".

5.9.1.54 TC_STRING tc_species_status (TC_STRING *species_name*)

Returns the status of "species_name" where status may be one of "ENTERED" or "SUSPENDED"

5.9.1.55 void tc_version (TC_STRING *str,* TC_INT *str_len*)

Returns the version of Thermo-Calc in "str"

- int main (int argc, char *argv[ ])

5.12.1 Macro Definition Documentation

5.12.1.1 #define TC_API_LIBRARY_NAME "libtcapi-linux-ia32-gfortran-7.8.11410.so"

Definition at line 28 of file tcMain.c.

5.12.2 Function Documentation

5.12.2.1 int importLibThermoCalc (tc_function_library * *tc*, char * *message*)

Definition at line 66 of file tcMain.c.

5.12.2.2 TCHANDLE loadTCLibraryInCurrentDir ( )

Definition at line 38 of file tcMain.c.

5.12.2.3 int main (int *argc*, char * *argv[ ]*)

Definition at line 100 of file tcMain.c.

5.13 tcutils.c File Reference

```
#include <stdio.h>
#include <stdlib.h>
#include <string.h>
#include "tcutils.h"
```

Include dependency graph for tcutils.c:

Functions

- void getThermoCalcEnvironmentPath (char *pathBuffer)
- void getTempEnvironmentPath (char *pathBuffer)

5.13.1 Function Documentation

5.13.1.1 void getTempEnvironmentPath (char * *pathBuffer*)

Get path to temp directory If it can't find it - default to current working directory

Definition at line 29 of file tcutils.c.

5.13.1.2 void getThermoCalcEnvironmentPath (char * *pathBuffer*)

Get path from the values of Thermo-Calc environment variables TCDEV_HOME TCPATH Older versions and fall-back

Definition at line 12 of file tcutils.c.

5.14 tcutils.h File Reference

`#include <unistd.h>`
Include dependency graph for tcutils.h: This graph shows which files directly or indirectly include this file:

Macros

- #define getCurrentWorkingDir getcwd
- #define TCPATH "TCPATH"
- #define TCDEV_HOME "TCDEV_HOME"
- #define TEMP "TMPDIR"
- #define SLASH "/"

Functions

- void getThermoCalcEnvironmentPath (char ∗pathBuffer)
- void getTempEnvironmentPath (char ∗pathBuffer)

5.14.1 Macro Definition Documentation

5.14.1.1 #define getCurrentWorkingDir getcwd

Definition at line 6 of file tcutils.h.

5.14.1.2 #define SLASH "/"

Definition at line 21 of file tcutils.h.

5.14.1.3 #define TCDEV_HOME "TCDEV_HOME"

Definition at line 10 of file tcutils.h.

5.14.1.4 #define TCPATH "TCPATH"

Definition at line 9 of file tcutils.h.

5.14.1.5 #define TEMP "TMPDIR"

Definition at line 15 of file tcutils.h.

5.14.2 Function Documentation

5.14.2.1 void getTempEnvironmentPath (char ∗ *pathBuffer*)

Get path to temp directory If it can't find it - default to current working directory

Definition at line 29 of file tcutils.c.

5.14.2.2 void getThermoCalcEnvironmentPath (char * *pathBuffer*)

Get path from the values of Thermo-Calc environment variables TCDEV_HOME TCPATH Older versions and fallback

Definition at line 12 of file tcutils.c.
